

# SMART BOMB CRATERS FOR ARROW SEEDLINGS DROPPED FROM DRONES

**AFTER SLOPES AND STREAMS ARE MANUALLY PREPARED FOR WATER RETENTION AND FLOW WITH HEMP MESH AND/OR MULCH, DRONES LOADED WITH SEEDLINGS ENCASED IN ARROWS ARE ABLE TO BE PLANTED FROM THE AIR BECAUSE ARMAMENTS CONTRACTORS ARE ALLOWED TO COMPETE WITH THEIR SMART BOMB AND MORTAR TECHNOLOGY BY CREATING AN ARRAY OF SMALL CRATERS. THIS SAVES THE COST OF HAVING TO ORCHESTRATE A WAR SOMEWHERE BECAUSE PURCHASERS (AND MANUFACTURERS) OF ARMS DELIVERY MECHANISMS ARE THE VICTIMS OF USE BY DATES.**
